**ARTTED** CO. INC.

**SPECIALTY TRANSFORMERS, INDUCTORS AND TOROIDS**

Founded in 1945, the Artted Company's early start in the electronics industry formed a solid foundation on which we have built our reputation for quality products and reliable service and delivery.

From a small beginning producing peaking coils to manufacturing today's sophisticated transformers for power supplies, Artted has gained knowledge and experience in a wide range of coil and magnetic variations. This expertise — the kind that only comes with over 30 years in the industry — means you can be certain Artted has the capability to handle your most difficult coil and magnetic problems.

In addition to our technical expertise, Artted has the facilities and equipment to handle almost any job. Our equipment includes state-of-the-art winding, assembly and test equipment, which are housed in our own modern, 36,000 square foot, climate controlled building.

What's more, our staff of expert, well-trained production people make quality their #1 concern — and they're ready to go to work for you.

Add it up — years of electronics experience, a reputation for quality and dependability, highly qualified and conscientious staff, and a modern 36,000 square foot facility — and you'll see that Artted is the logical choice for all of your magnetic component needs.
